

“Call it inside information,
but I knew Bronson was
the best place to care for my dad’s heart.”

Carrie Kotecki, RN – Director of Emergency Services

When Carrie Kotecki found out her father was having chest pain, she made sure he went to Bronson’s Chest Pain Emergency Center. She knew he would have access to the most advanced technology and a specially trained team of experts. Shortly after his arrival, her father was diagnosed with a severely blocked artery and a stent was immediately put in place to open the artery.

No one knows Bronson better than the people who work here. They see firsthand all the new ways we provide exceptional heart care—like introducing the first accredited Chest Pain Emergency Center to southwest Michigan.

So it’s no surprise, when it comes to chest pain, more people in Kalamazoo County prefer Bronson.
