

“The advantage of working at Bronson is you know
it’s the best place to treat chest pain.”

Sarah Thurston – Health Information Management

When Sarah’s husband was dizzy and experiencing chest pain, she thought the worst. So she wanted him to go to the best—Bronson’s Chest Pain Emergency Center. She knew he’d have access to the most advanced technology and a specially trained team of experts. Shortly after his arrival, her husband underwent several tests and a heart catheterization. Results revealed he was not having a heart attack.

No one knows Bronson better than the people who work here. That’s because they see firsthand all the new ways we provide exceptional heart care—like introducing the first accredited Chest Pain Emergency Center to southwest Michigan.

So it’s no surprise, when it comes to chest pain, more people in Kalamazoo County prefer Bronson.
