- Bronson Cardiothoracic, Vascular & Endovascular Specialists specializes in [limb preservation](#)
- VBEMS now using [new ambulance cots](#) that reduce strenuous lifting and risk of back injury

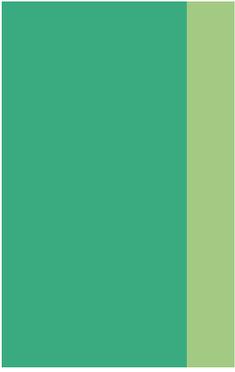

## Lunch and Learns

BMH Trauma Surgery Services values the strong working relationship that it has with local and regional EMS and is in the process of scheduling quarterly lunch and learn sessions. These sessions will provide a forum to discuss issues important to the team as well as new or changing treatment options in the care of traumatically injured patients.

These RSVP Lunch and Learn sessions will be open to all EMS services. Lecture and practical CE's will be provided, based on subject matter, for those that attend.

As always, thank you for your continued commitment to providing excellent care to the traumatically-injured patient. Please send suggestions on content to [kingt@bronsonhq.org](mailto:kingt@bronsonhq.org).
