

Bronson Wellness Center Plan for Re-Opening: Wiping Down Your Equipment

The safety of our members and staff has always, and will always, be our top priority. Our team is prepared to do everything possible to keep the club safe and clean upon re-opening. We have installed **176 cleaning stations throughout the club**. We call these Gym Valets, and each is equipped with a hospital grade disinfectant and a black microfiber towel. The disinfectant we have chosen is a quat disinfectant manufactured by 3M. We also have installed **17 wall mounted hand sanitizers**.

BEFORE and AFTER you use and cardio or strength training equipment

1. Spray the black towel with the cleaning solution – which is ready for use at the Gym Valet on each piece of equipment. **Please, never spray directly onto the equipment.**
2. Wipe all surfaces that your hands and your sweat will touch. This can include elliptical handles, bike seats, equipment screens and more.
3. Return the bottle to the Gym Valet and place the towel on the hook for the next user.

Your safety is at your fingertips. Always clean equipment before and after use!
